

Once you go XM, you never go back!!!!

The regular radio stations have FAR to many commercials. It's like MTV. They don't play video's anymore, they only have the reality shows on now. This is what regular radio is turning into. There are to many commercials, and to much talking. If I am on a long trip, or a morning drive to work, I want to be entertained by music, not frivolous talk. XM is perfect for the morning commute in LA, as well as the long drive to visit family and friends. You get all different kinds of music and don't have to worry about the talk time the regular stations have.

I love getting into the car and knowing that I have an hour drive to work, and for that hour, I have music all the way.

Why is the Goverment trying to control so many things that makes America a free society and a great place to live?

Next they are going to try and control Cable...Heaven forbid they get rid of HBO :-)

It would be a sad day in America to take away our XM....
